MBER SKIES

like to watch the sky
nd September somet- yet with enough at- e heavens to be of Of the sixteen few of them are mber nights.

least two may be d Fomalhaut, Vega stellation Lyra and in the constellation ila.

stand in his yard and up into the sky in will see the North- almost directly above. Star will be almos t, the cup of the Big will be near the ho- at about 330 de-

ens toward the south, the constellation of and Sagittarius, the star Fomalhaut quite near the hori-

son. And, in looking straight up, at the Northern Cross, Vega will be seen about one-fourth of the way toward the horizon due west.

Further, the Little Dipper will be seen almost midway between the Northern Cross and the Big Dipper, that is, in the middle northwestern sky.

An interesting star in the September sky is Altair. Altair will be found about one-third of the distance to the southern horizon from the Northern Cross. It is a bright star and one of our closest neighbors. It is not a large star, but it is bright because it is so close—only fifeen light years away.

The People and The Truth

The most ominious thing about the Soviet Union's resumption of nuclear testing is the definite indication Russia has, or will soon have, a bigger bomb than we have yet produced, or some new weapon.

The huge bomb, or the new weapon, will be used to terrorize the world, and this seems to be the shape of Soviet policy for the moment. Judging from the success Nikita Khrushchev had in terrorizing the frightened "neutralists" at Belgrade with his contempt and distain for their opinion, the method might produce dividends.

There is a grim lesson in events of recent years for all Americans.

That lesson may be hard for some partisan people to swallow, but it is nevertheless apparent: The American people have been told less than the full truth.

The bitter truth is that we have failed since World War II to do an adequate job, For example:

This is not secret information, save to the mass of the American people, concerned as they seem to be with their games and gadgets, and favorite music programs!

In 1962, it is estimated by reliable authorities, the Russians will have 200 ICBM'S with warheads of fifteen MEGATONS!

By the end of 1960, we were said to have had 34, non-completely - reliable Atlas ICBM's with warheads of five MEGATONS. At that time we had over 30 short-range Polaris missiles. Both the Russians and the United States had intermediate range missiles—we had FIFTEEN Thors only, stationed on a base in England.

Small wonder that the Russians are arragant!

Small wonder the "neutrals" — old friends of ours — are making their "arrangements" to get along with Moscow!

This newspaper sincerely believes that, as President Harry Truman "held the line." He did not hesitate to enter the Korean conflict. But since, our national policy seems to have been to spend all the MONEY we could BORROW, and borrow some more to pay the INTEREST — and use cheapened dollars to BUY FRIENDS.

It is time that the American people be told the facts of the FATEFUL SIXTIES!

APPOMATTOX ELEMENTARY S. C. A.

On Monday, Sept. 11, the S. C. A. of the Appomattox Elementary School elected officers. Walton Pankey was elected president; Julia Ann Guill, secretary, and Mary Lou Martin, reporter.

The following are named representatives from each room:

Mrs. Cunningham's 5th grade, Jimmy Woolridge;

Mrs. Lagon's 5th grade, Vaterie Paulette;

Mrs. Cyrus's 6th grade: Sandra Gilbert;

Mrs. Evans' 6th grade: Suzanne Guill;

Mrs. Furbush's 6th grade: Valeris Brannon;

Mrs. Carson's 7th grade: Joanne Chuchek.

Mrs. Henson's 7th grade; Jean Chuchek.

Some of the things the S. C. A. has helped purchase are encyclopedias and a movie screen for Appomattox Elementary School.
